AltCampus, Dharamshala (HP) – Full-Stack Web Development [2023-2024]

YMCA UNIVERSITY(Haryana) – Bachelor of Technology(CSE)

PROJECTS

Tourest ([Live Demo](#) | [Github](#))

 **Tech:** HTML, CSS, JavaScript, React.js, Bootstrap, Vercel

Project Description:

Developed a responsive travel website with dynamic navigation, smooth scrolling, mobile-friendly hamburger menu, and integrated newsletter subscription and social media links for user engagement.

Responsive Navigation Bar: Designed a mobile-friendly navbar with a toggle menu using React state.

Smooth Scrolling: Enabled smooth page navigation for a better user experience.

Modern UI: Styled using Bootstrap and custom CSS to ensure a clean and visually appealing layout.

Newsletter Section: Integrated an input field and button for users to subscribe via email.

Social Media Links: Added interactive icons using Font Awesome to improve accessibility and connectivity.

Reusable Components: Structured the project with React functional components for modularity and reusability.

FormValidation ([Live Demo](#) | [Github](#))

 **Tech:** React, Formik, Yup, React Icons, Vite and ESLint

Developed a form validation application using React, Formik, and Yup.

- Real-time validation feedback
- Password visibility toggle
- Display of submitted data in a card format
- Automatic page refresh after submission

AltEvent ([Live Demo](#) | [Github](#))

 **Tech:** HTML, CSS, JavaScript, Font Awesome

Designed a visually appealing event management website for a fictional company.

Created a mobile-friendly layout ensuring accessibility across devices.
